

**NIATx Seven Systemic Conditions for Integrated Holistic Care  
 and Health Care Reform**

**Conditions for**

**Reform**

**What Exists**

**What's Needed**

Conditions for Reform	What Exists	What's Needed
Patient Identification	Primarily through criminal justice referral	Referrals from all health care systems and non-traditional health systems and population centers
Accountability for patient care & outcomes	Specialty care focus	Integrated health services, seamless handoffs, and follow up
Treatment practices	Mix of personal experience, evidence-based practices, & self help	National Quality Forum Evidence Based Practices Data driven treatment planning
Patient & Family Role	Dependent on clinician for treatment and care management  Family has no formal role	Goal of self-care that is technology enabled  Family and peer support or knowledge exchange  Family supports self-care
Workforce	Sparse MD, sparse RN; up to 50% licensed	More MDs, more RNs; 70% licensed, and trained peers
Technology	Limited to billing systems	Need for follow up & track across the continuum; EMR, patient self management
Infrastructure (Business system)	Separate registration, appointment, & follow up systems  Difficult to accept new payers	Integrated patient and business management systems  Easy to accept new payment sources  A data repository for evaluation or ongoing assessment of business operations
